WHAT WE DO BEST INFINI<sup>∞</sup>DRIP Infini<sup>∞</sup>Drip - Intravenous Micro Nutrient Supplementation is a method of infusing vitamins, minerals, and amino acids through a small needle inserted on a vein in your arm, directly to your bloodstream. The benefits are endless. It can rehydrate your body, rejuvenate your skin and hair, replenish lost nutrients, helps you bounce back from stress, jet lag or surgery, aid you in dieting and detoxifying your cells from free radicals. It's scientifically-proven, effective and has immediate results. Our Infini<sup>∞</sup>Drips are targeted toward enhancing overall health and wellness as well as bringing back your vitality. The cornerstone of the Infini<sup>∞</sup>Drip experience utilises the benefits of intravenous (IV) fluids, amino acids, and vitamins to treat the accumulative effects of dehydration.

Please note we are very selective with regards to what specific symptoms and conditions are appropriate for Infini∞Drip session, and certain other health conditions you may possess could disqualify you from receiving Infini∞Drip such as obesity, severe illness or medical condition, shock, and drug dependency. The formulations provided at Infini∞Drip are scientifically-proven, preservative-free, time-tested and more affordable done by fully accredited, licensed, and experienced registered IV practitioners.
